Wildlife Control Supplies

Large variety of nuisance wildlife and animal handling equipment and supplies anywhere.

Phone: 877-684-7262
Website: www.wildlifecontrolsupplies.com

10. Cut Flower Production and Supplies

Note: As required by NOP Rule Section 205.204, the producer must use organically grown seeds, annual seedlings and planting stock except that non-organically produced untreated seeds and planting stock may be used to produce an organic crop when an equivalent organically produced variety is not commercially available. **Please see the VOF Certified Organic Seed, Annual Seedling and Planting Stock Guide for sources of certified organic seeds, seedlings and planting stock.** Planting stock includes any plant or plant tissue other than seedlings but including rhizomes, shoots, leaf or stem cuttings, roots, or tubers, used in plant production or propagation. The sources noted below mainly offer conventional bulbs and tubers that may be used for organic flower production **as long as it can be documented that the planting stock was not treated with prohibited substances post-harvest.** See also the VOF **Approved Untreated Planting Stock Sources Guide** for a list of planting stock that VOF has verified has not been treated post-harvest.

Association of Specialty Cut Flower Growers

Offering special assistance and continuing information on growing and marketing.

Address: MPO Box 268, Oberlin, OH 44074
Phone: 440-774-2887
