

VOF Approved Compost and Compost Based Products

Vermont Organic Farmers, LLC (VOF)

Northeast Organic Farming Association of Vermont (NOFA-VT)

VOF Office: 802-434-3821 vof@nofavt.org www.nofavt.org

The following commercial compost producers have either had their compost production facilities inspected by Vermont Organic Farmers or have otherwise had their compost and compost-based products reviewed and determined to be allowed for use in certified organic production. Compost purchased from sources that are not listed here may be applied to a food crop no less than 90 days prior to the harvest of a food crop whose edible portion is not in contact with the soil and no less than 120 days for a food crop whose edible portion does contact the soil, provided all feedstocks are allowed materials (either nonsynthetic substances not prohibited by § 205.602, or synthetics approved for use as plant or soil amendments). Producers wishing to use commercially available potting soils and seed starting mixtures that are not listed as approved for organic production by OMRI, WSDA or VOF should contact the VOF office to request that a product review be completed to assure compliance with the NOP Rule prior to use.
